SIMPLE & CLEVER

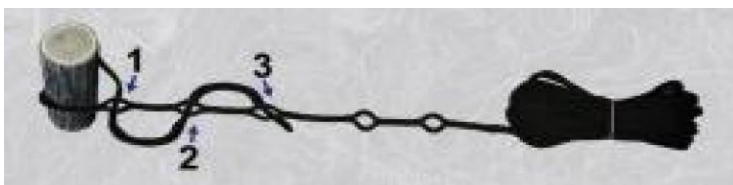

EASY TO TWINE
&
EASY TO RELEASE

KNOTS ARE SUPERFLUOUS!!

Particularly woven rope with continuous integrated openings. Very useful for:

- attaching hammocks
- the securing of tents (as guy rope)
- windproof washing line (use openings to hang items instead of using clips)

Thread the end of the rope through three successive openings. When the rope is tightened the openings will close and the rope cannot move anymore. An additional knot is not necessary.

To adjust the length of the rope you only need to release the tension and move the rope forward or backwards through the openings.

Smart Products In Tapes & Alternatives (SPITA)

Specifications (strength):
